

Nortech Packaging will be showcasing their most wanted packaging solution at West Pack, West Coast's largest annual packaging event that will take place in the Anaheim Convention Center from the 5th to the 7th of February.

All West Pack attendees that visited booth #5156 will get the chance to see the R00-100 Pre-Made Pouch Fill & Seal Machine developed by Nortech Packaging. This pouch packing solution has garnered a lot of attention, and it's already being utilized by a number of first class manufacturing companies.

Quick 30 second changeovers, a compact footprint, competitive pricing and applicability in any industry are just a few of the reasons that make this machine particularly interesting not only for new and small businesses, but for big players as well.

"The flexibility of the R00-100 is its main advantage. The standard 5 station model can be enhanced with two additional stations depending on the application. It is suitable for any kind of dry product: free-flowing or non-free-flowing powders, candy, snacks, pharmaceuticals and nutraceuticals, stick packs, etc... Being available with all standard in-feeds, the R00-100 is applicable to any industry. Also, this pre-made pouch fill and seal machine decreases downtime, increases efficiency, is very competitively priced and it accepts the widest range of pouch sizes in the industry," says Dave Showman, the CEO of Nortech Packaging.
