### **Blending Tech, People, and Investment for Job Growth in Wisconsin**

CEDARBURG, Wisconsin - PartsBadger, LLC. has completed the purchase of a 15,000 sq. ft. facility in Cedarburg, Wisconsin, just north of Milwaukee. Located at W66N205 Commerce Court, this facility gives PartsBadger the ability to expand operations and manufacturing in Wisconsin.

PartsBadger accelerates the innovation of businesses from start-up to multinational corporations by providing responsive machining services with instant quoting, fast lead times, and limitless capabilities. PartsBadger combines technology, innovation, and manufacturing in a way that is transforming the industry. Over the next 5 years PartsBadger plans to bring immense job growth and prosperity to southeastern Wisconsin.

#### **PartsBadger Economic Opportunity in Cedarburg:**

- Estimated \$236M total economic spend over 5 years
- Creating 30-40 skilled labor jobs in 2019
- Creating 25-30 support and operations jobs in 2019
- Increase U.S. manufacturing capacity with a \$1.6M expansion investment

Roy Dietsch, CEO of PartsBadger says, "I created PartsBadger, along with business partner Jimmy Crawford, to fundamentally change the way companies innovate. Our core values; Fast, Innovative, Responsive, and Friendly, allow us to expedite the innovation of others."

PartsBadger also invests in employee growth: competitive compensation, health & dental, daily catered lunches, professional development, opportunity for advancement, open line communication with executives, and retirement benefits contribute to PartsBadger being a great place to work. "We are excited to bring our core values and economic opportunity to Cedarburg. Come grow with us!"

#### **About PartsBadger**

PartsBadger offers a revolutionary change to the way people and businesses source their custom parts. PartsBadger is an online machine shop offering custom CNC parts for entrepreneurs, engineers, product designers, manufacturers, and makers. Instant 24/7 quotes and our aggressively low pricing removes the barriers to innovation faced by the dreamers and doers who need machined parts.
